

Successful Urban Agriculture matches the right plant with the right place

SUCCESS TIP:

Having trouble knowing what to do and how to do it? Consult your local nurseryman/landscaping professional for knowledgeable insights to match the right plant with the right place!

Your Urban Farm

1. Front yard (public space)
2. Back yard (private space)
3. Side yards (transition areas)
4. Service areas (Urban ag at work)
5. Play areas
6. Food areas (vegetable, herb gardens, fruit/nut trees)
7. Outdoor living room (an extension of your home)
8. Porches
9. Indoor plants

Some Plant Considerations...

1. Soil type and condition
2. Plant water needs
3. Plant sun and shade needs
4. Plant height
5. Annual or perennial?
6. Type foliage desired
7. High maintenance, natural growth, or somewhere in between?
8. Blooming or non-blooming?

Tips for Successful Urban Agriculture

1. Consult with knowledgeable sources
2. Establish a budget
3. Establish a plan within budget for each area where planting is to occur including plant types(s), soil needs, water delivery method and other considerations
4. Plant your urban farm per instructions
5. Maintain your crops through proper watering, pruning, care, etc.
6. Enjoy the beauty of your urban farm
7. If you prefer not to do it yourself, contact your local nurseryman/landscaper who will professionally assist you in obtaining your urban farm goals
