

- 
- The background of the slide is a close-up photograph of sheep's wool, showing its characteristic crimped and fibrous texture in shades of off-white and light beige. A semi-transparent white rounded rectangle is overlaid on the center of the image, containing a bulleted list of facts about wool.
- **Wool is the hair, or fleece, of a sheep.**
 - **Wool is a natural, renewable product that grows from the follicles of the sheep's skin.**
 - **Wool is strong, durable, elastic, warm, absorbent, and flame resistant.**
 - **Wool is categorized into four major types: long wool, fine wool, medium wool, and carpet wool.**
 - **Most medium wool breeds have been selected for meat production rather than wool quality.**
